

Distributor for Equipment and Supplies

Griffin Resources specializes in supporting government agencies, prime vendors and sub-contractors. We successfully accomplish this by utilizing our in-house combination of strategic and project procurement skills, technical/application expertise and logistics knowledge. Our team consists of over 20 years of supplying both products and services to our customer base both here and overseas. Some of the agencies we have worked with are; Department of Veterans Affairs, US Special Operations Command, and United States Army. We're very experienced in the intricacies of government contracting (both Federal and State) including the facilitation and use of our HUBZone and Service-Disabled Veteran owned certifications at both the Federal and State levels.

Industries covered include the medical, industrial and the warfighter markets. These markets and Griffin are continually growing and adjusting to better serve our customers. We maintain a growing list of partnerships, distributor agreements, and teammates across the country. We are prepared to serve everyone from small, local businesses to national companies. One of our strongpoints is the goal to meet each of our clients face to face so as to establish long term working relationships. We don't take orders, we work for them. Griffin has this team of experts waiting to help you. If your product and/or service requires a distributorship team that knows your products' features and benefits and requires they be explained to each and every customer, then Griffin is the partner for your firm.

At Griffin, we make a conscious effort to maintain a company that is responsive and committed to fulfilling the customer's needs. When it comes to equipment and supplies, access to full product lines, rapid delivery from stock, and great, knowledgeable people, Griffin Resources is top notch. As a company we continue to improve our systems and utilize the most up to date technology to provide efficient and reliable service so that you can be safe, efficient, and productive.

Our team would appreciate the opportunity to meet with you and your Business Development team to determine if our resources and your products/services can be best served by teaming together to cover regional and/or national market segments that you may feel are underserved with your present sales network. If interested let's set up a time soonest and we can meet at your facility or ours and take our discussion to the next level.
